

WILLIAM & MARY

BRAY SCHOOL LAB

23 February 2024

Greetings from the William & Mary Bray School Lab!

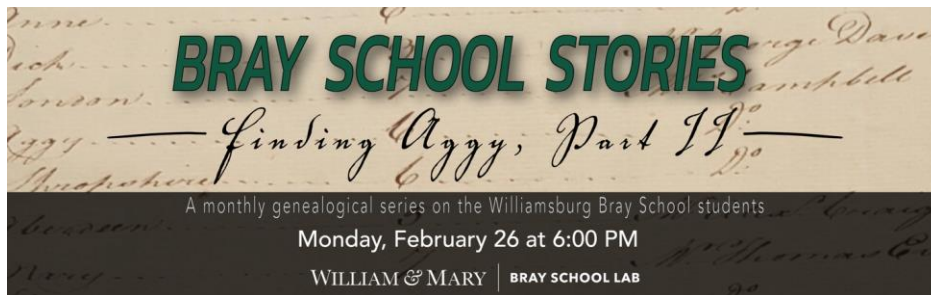

We wanted to remind you about our upcoming Zoom genealogy event, *Bray School Stories: Finding Aggy, Part II*.

 DATE: Monday, February 26, 2024

 TIME: 6:00 – 7:00 PM

 LOCATION: Zoom | [Register here](#)

Free and open to all members of the public!

Led by Elizabeth Drembus of the W&M Bray School Lab, these sessions are a blend of research and exploration, aiming to shed light on the past and connect it to the present through descendant-centered genealogical research.

Each month, Elizabeth will focus on a different member of the student community of the Williamsburg Bray School. In February, Elizabeth will return to Aggy, highlighting advancements in the research, findings, and questions still to answer about Bray School scholar and her daughter Kitty.

Elizabeth's approach is grounded and engaging. Drawing from her deep expertise in genealogy, she presents findings, shares tales of discovery, and opens discussions about challenges. Participants will find a space to ask questions, share insights, discuss possibilities and delve deeper into genealogical methods. The sessions are interactive, ensuring everyone has a chance to contribute. And while the focus is on the Bray School students, attendees will walk away with

more: a sense of connection to history, a better grasp of genealogical research, and resources to explore their own family histories.

In just an hour, this monthly gathering offers a glimpse into the rich tapestry of the past, inviting everyone to engage, learn, and remember. It's a curated, guided, shared journey into history.

This event is free and open to all members of the public, but [advance registration is required](#).

After you register, catch up with our past episodes of [Bray School Stories](#).

Sincerely yours,

William & Mary Bray School Lab
